PLR usage

If you invested in the PLR version of **Profitably Convenient Fingertip Daily WSOs**, you have the source document available.

Some customizing ideas include:

- You can change the headers and footers to reflect your site/ads, etc.
- You can change Honorable Samurai to your own mascot and change the links to reflect to your affiliate ID.
- You can slice up the report into specific chapters and create individual reports.

Now, all of the links in **Profitably Convenient Fingertip Daily WSOs** are cloaked¹ – they specifically go to pages at <http://www.dailywsos.com>. However, you can edit the link to reflect instead your own cloaked link on your own server.

Key!

In the official **Profitably Convenient Fingertip Daily WSOs** product zip, you have a directory entitled “links”. Within that directory is the subdirectory “discover”, and under that....are all of the cloaked links you'll find in this report. You don't even have to search them up at the Warrior Plus forum; I've cloaked them for you!

1 Visit [Beginners Affiliate Marketing Tips for Power Starts](#) for more info about link cloaking.

you can simply change² the affiliate ID to your affiliate ID in all the files, upload the “discover” directory to your server, and then edit the PLR to reflect your domain.

Your Warrior Plus affiliate ID is the last batch of numbers that show up after your affiliate link. So, let's say that one of your affiliate links is

<http://www.warriorplus.com/linkwso/x1msjm/18217>

Your Warrior Plus affiliate ID would be 18217.

Now, that happens to be my WarriorPlus affiliate ID (*I wanted to give you a working example*). Thus, you would find your OWN Warrior Plus Affiliate ID, and then edit all the files within the links/discover directory like so:

Replace 18217 with your WarriorPlus affiliate ID via the find/replace tool.

To learn more about WarriorPlus affiliates, visit

<http://www.warriorplus.com/support/knowledgebase.php?category=5> .

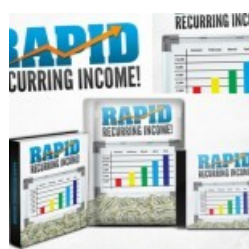

With that, it's time to reveal the very best of the profitably convenient fingertip daily WSOs of October of 2011! Turn the page and enjoy.

² <http://www.replsoft.com/replacer.html> is a multi-file find-replace utility.

WP ViralGreet Developers Benefits

This is a neat WordPress plugin that lets you specify specific messages for your visitors. Ie,

Depending on where your visitor is coming from, WPViralGreet will display

two things: A button of the referring site in the left middle part of the page (fb like button, digg button, etc.), and a modal box with a greeting message that was set to display for that referrer, as well as another button. You can even set this modal box to lock the content if the referrer is Google or Facebook, and thus force visitors to +1/like in order to unlock the content.

You can even set this modal box to lock the content if the referrer is Google or

Facebook, and thus force visitors to +1/like in order to unlock the content.

2. They begin reading an article you’ve got on your site called “5 Ways To Get Your Lab To Stop Peeing On The Carpet.”

“For the last 3 tips, including a trick developed by the greatest dog-trainer alive, please click the Google +1 button below now.”
