Autoblogging with WP Made Easy

Step #1 - Make Sure You Have Your Own Domain and have These Tools

Autoblogging with WP simply means you have a plugin that will create automated posts (based upon your criteria).

So you basically set up "rules" for "how to pull in content." Ie, you can pull in straight RSS feeds (ie, blogs from other peoples/sites), from YouTube, from Amazon Products, and the like.

So at the very least you need:

- A Wordpress site (ie, your own domain) that is running Wordpress
- A WP Plugin that pulls in feeds like:
  - **YouTube Feeds plus Social Promotions** – **Traffikrr** (use coupon **barbcoffee**)
  - **Straight RSS Feeds** – RSS post informers

Next:

Step #2 – Decide What You Want To Autoblog

The next thing you have to do is figure just WHAT to autoblog. Consider:

- **Your Autoresponder Feed** (learn how set that up at aWeber at http://askblings.com/auto1 , GetResponse at http://askblings.com/auto2). The benefits to this is you can always find your messages online via a simple Google Search. **Daily WSOs** started as a straight autoblog of my email marketing).
- **Other People's Blog Content.** The thing to be careful about this is you don't want to duplicate someone else's content for the purpose of your own profits. **Contact the blog owner FIRST to request permissions** (it's good manners). Post a snippet perhaps with a direct link to the original content. You will then monetize the space above the snippet, below the snippet, your sidebar, etc.
- **Amazon Affiliate Products** (lots of superb products pull in Amazon feeds like these here. Additionally, Amazon Stream Stores will stream the latest updates, deals and discounts
- **eBay Affiliate Products** (if you're an eBay affiliate, you can grab your RSS feeds here).

Once you decide what content to autoblog, move to:

Step #3 – Set It Up With These Tools

Now that you know what you want to autoblog, do this.

Step 1.) Decide HOW you want to monetize the rest of your page**. Autobloggers generally have a form where you can enter content ABOVE and BELOW the reblogged content. Traffikrr, for example, gives you a fully HTML window to add things like: "Want to profit bigtime like this guy goes?** Use coupon code: **barb** to drop the price big and check out his super DeadBeat Affiliate Program over at **http://askblings.com/dba !"** See that example over **HERE**).

Step 2.) Install the required plugins. For reblogging your own eMail Marketing or other blog feeds, **RSS post informers** does the job grand!! Use these other plugins for additional autoblogging:

- YouTube keywords, channels, users plus automatic sharing to social sites: **Traffikrr (**use coupon **barbcoffee)**
- Amazon Updates: **Streaming Stores**, **eCom Machines**, **WooCommerce**
- eBay, Aliexpress: **ProfitCom** (**use coupon barb10offwp**)

Got that? Alright then, move to:

Monetizing Ideas... and Your Next Steps

You can monetize autoblogged sites in bunches of ways!

My fav way is to pick a particular product creator, autoblog their YouTube videos, and include an affiliate link to their products on the page. I also first ask permission as well.

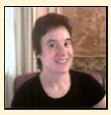

If I'm building an eCom store, I will autoblog niche products.

And of course, autoblog your aWeber/GetResponse mailings! HIGHLY recommend this – that in the future, if you want to do any repromos, you can use Google to search thru the posts to locate your info. Ie, the Google search "site:dailywsos.com profitcom" showed me where to find my link and coupon (I listed that in Step 3)

Sweet! ==========➔ So! Your next steps are to put all the above into action! **First: Follow each step**. **And when its done, rinse and report.**

The coffee is in your cup – make a stellar brew today!
